```
t one
nge("A1").Select
lect

source data to the destination sheet, aiming
A1 on the first loop then one past the
pied row in column A on each following loop
= 1 Then
LastRow = 1
gDst = wksDst.Cells(1, 1)

LastRow = LastOccupiedRowNum(wksDst)
gDst = wksDst.Cells(lngDstLastRow + 1, 1)

y Destination:=rngDst '<~ this is the copy / paste

ne! We want to add the source file info
of the data blocks to our destination

rst loop, we need to add a "Source Filename" column
= 1 Then
LastCol = LastOccupiedColNum(wksDst)
.Cells(1, lngDstLastCol + 1) = "Source Filename"

the range that we need to write the source file
then write the info
t

irst row we need to write the file info to
e same row where we did our initial paste to
estination file
FirstFileRow = lngDstLastRow + 1

we need to find the NEW last row on the destination
'sheet, which will be further down (since we pasted more
'data in)
lngDstLastRow = LastOccupiedRowNum(wksDst)
```
