

# # Access Python Array Items

## # Declaring an Array

```
array = [1, 2, 3, 4, 5]
```

## # Use Positive Index

```
print("Item at Index Position 0 = ", array[0])
```

```
print("Item at Index Position 1 = ", array[1])
```

```
print("Item at Index Position 2 = ", array[2])
```

```
print("Item at Index Position 3 = ", array[3])
```

```
print("Item at Index Position 4 = ", array[4])
```

Python 3.7.0 Shell

```
==== RESTART: /Users/suresh/Documents/Python
```

```
Item at Index Position 0 = 1
```

```
Item at Index Position 1 = 2
```

```
Item at Index Position 2 = 3
```

```
Item at Index Position 3 = 4
```

```
Item at Index Position 4 = 5
```
