

CODE A HANGMAN

```
eclipse-workspace - Hangman/src/Main.java - Eclipse IDE
import java.io.*;
import java.util.*;
import java.util.Scanner;

public class Main {

    public static void main(String[] args) {
        // Auto-generated method stub
        Dictionary dictionary = new Dictionary("src/dictionary.txt");
        Scanner textScanner = new Scanner(dictionary);
        Scanner input = new Scanner(System.in);

        List<String> words = new ArrayList<>();
        while (textScanner.hasNextLine()) {
            words.add(textScanner.nextLine());
        }

        String hidden_text = words.get((int)(Math.random()*words.size()));
        char[] |
    }
}
```
