

□ Personality

Personality made up the characteristics patterns of thoughts, feelings and behaviors that make a person unique.

□ According to Sigmund Freud

Personality is a combination of emotions , behaviors and motivations that comprise an individual human being.

□ Explain with Examples

If your boss wants you to a job in a certain way , you will do it even if you disagree with your boss. This is biological pressure. Similarity, you stop work and go for your lunch if your are hungry. This is biological pressure.
