Many of us dream of leaving the modern world behind and escaping to an idyllic off-the-grid cabin where we can relax, enjoy quiet time and be with nature. In this weeks episode, we meet an inspiring couple who did exactly that, building an amazing cabin by the river.

At 54 square meters, (850ft²) this small cabin is situated in a stunning location with panoramic views looking over the river and out to the forest beyond. Completely off-the-grid, solar powered and with rain water collection, this cabin is a beautiful and fully functional home.

From its modern, black exterior through to the warm plywood interior and exceptional views, this cabin is a dream home. Enjoy the full video tour!
