

ART PRINCIPLE

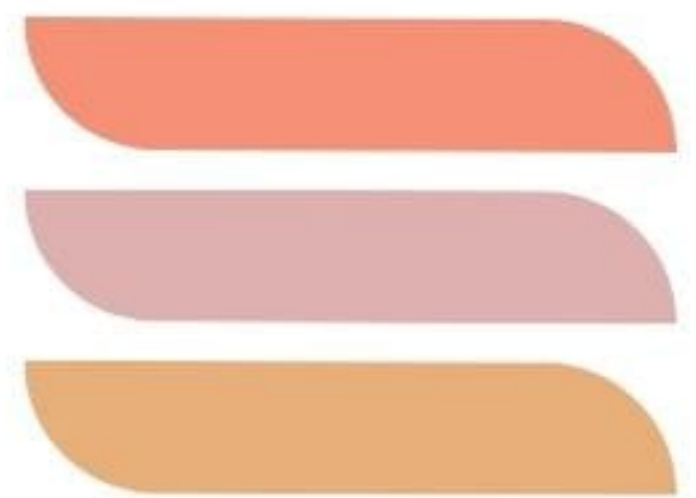

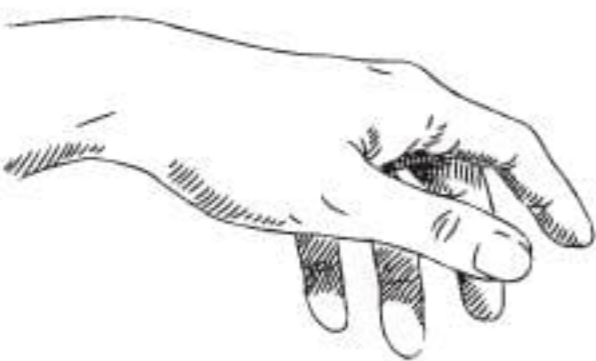

UNITY

Unity in art is one of the seven principles of art and is responsible for the harmonious arrangement of art elements within a design.

It organizes all the elements so they can work together to convey a single, cohesive message or visual experience and gives a composition a sense of wholeness and completeness.

You can use one of these **5 ways to express unity**:

- simplicity,
- proximity,
- repetition,
- alignment,
- continuation.
