needed.

Let's add an `alt` attribute to our `img` example above:

```

```

Let's try to add an image to our website:

Within the existing `main` element, insert an `img` element before the existing `p` elements.

Now set the `src` attribute so that it points to this url:

```
https://bit.ly/fcc-relaxing-cat
```

Finally, don't forget to give your `img` element an `alt` attribute with applicable text.
