

# Discovering computer Chapter 2

## Across

1. Process of transferring data in a continuous and even flow
2. Term that refers to links in text based documents
3. Business that provides individuals and organizations access to the Internet free or for a fee
7. Internet server that usually is associated with an Internet access provider
9. Location on an internet server that permits users to chat with each other
12. Built in connection to another related Web page or part of a Web page
15. Short for electronic commerce, a business transaction that occurs over an electronic network such as the Internet
16. Format that reduces an audio file to about one-tenth of its original size, while preserving much of the original quality of the sound
21. A number that uniquely identifies each computer or device connected to the Internet
22. Provides high-speed Internet connections via satellite to a satellite dish that communicates with a satellite modem
25. Word or phrase entered in a search engine's text box that describes the item you want to find
30. Any computer that provides services and connections to other computers on a network
31. Web site that offers a variety of Internet services from a single, convenient location
33. Process of a user adding his or her e-mail name and address to a mailing list

## Down

4. Company that provides Internet access as well as many members only features
5. Process of a computer receiving information, such as a Web page, from a server on the Internet
6. Combination of a user name and a domain name that identifies a user so that he or she can receive Internet e-mail
8. Message that reveals a solution to a game or ending to a movie or program
10. Recorded audio, usually an MP3 file, stored on the Web site that can be downloaded to a computer or a portable media player such as and iPod
11. First page that a Web site displays
13. Method that the Internet uses to store domain names and their corresponding IP addresses
14. Application software that allows users to access and view Web pages
17. List of names and e-mail addresses, created and stored by a user
18. Short for Internet etiquette, the code of acceptable behaviors users should follow while on the Internet
19. Online area in which users have written discussions about a particular subject
20. Unsolicited e-mail message or newsgroups posting sent to many recipients or newsgroups at once
23. Program used to build and maintain lists of words found on Web sites
24. Program that finds Web sites, Web pages, images, videos, news, maps, and other information related to a specific topic
26. Short for electronic mail; the transmission of messages and files via a computer network
27. Real-time typed conversation that takes place on a computer
28. Internet access that takes place when the modem in your computer connects to the Internet via a standard telephone line that transmits data and information using an analog signal
29. A fixed Web page where visitors all see the same content
32. Symbols used on the Internet to express emotions
35. File Transfer Protocol; an Internet standard that permits file uploading and downloading with other computers on the Internet
