Display Settings

The settings below control the display of your calendar. If things don't look right, try switching between the three style sheet options or pick a page template from your theme.

There are going to be situations where no out-of-the-box template is 100% perfect. Check out our [our themer's guide](#) for instructions on custom modifications.

Basic Template Settings

Default stylesheet used for events templates

- ☐ Skeleton Styles
Only includes enough css to achieve complex layouts like calendar and week view.
- ☐ Full Styles
More detailed styling, tries to grab styles from your theme.
- ☒ Tribe Events Styles
A fully designed and styled theme for your events pages.
