Divide. Write the answer in simplest form.

$$\frac{\frac{1}{3}}{\frac{2}{3}} = \frac{\frac{1}{3}}{\frac{3}{2}} = \frac{\frac{3}{2}}{\frac{3}{2}} = \frac{\frac{1}{3}}{\frac{3}{2}} = \frac{\frac{3}{2}}{\frac{3}{2}} = \frac{\frac{1}{3}}{\frac{3}{2}} = \frac{\frac{1}{3}}{\frac{3}} = \frac{\frac{1}{3}}{\frac{3}{2}} = \frac{\frac{1}{3}}{\frac{3}} = \frac{\frac{1}{3}}{\frac{3}}{\frac{3}} = \frac{\frac{1}{3}}{\frac{3}} = \frac{\frac{1}{3}}{\frac{3}} = \frac{\frac{1}{3}}{\frac{3}} =$$
