

Recovery

Your PC couldn't start properly

The operating system couldn't be loaded because the system registry file is missing or contains errors.

File: \windows\system32\config\system

Error code: 0xc0000098

You'll need to use recovery tools. If you don't have any installation media (like a disc or USB device), contact your PC administrator or PC/Device manufacturer.

Press Enter to try again

Press F1 to enter Recovery Environment

Press F8 for Startup Settings

Press Esc for UEFI Firmware Settings
