

EMRs —

Simplifying Paper Documentation & Billing for

Behavioral Healthcare Professionals

For too long, clinical directors have used EMRs to document behavioral health and issues. It's time to upgrade to an EMR that details your notes and outcomes correctly!

generic
addiction

Here's why!

As a Clinical Director, have you ever wished you could...

- Use one software system to manage clients AND staff?
- Have staff schedule and check in all groups by Level of Care?
- View all incomplete staff notes in one screen?
- Bulk review and sign group sessions/individual notes?
- Manage episodes of care and transfer among programs with ease?
- Support UR director with detailed clinical notes?
- Have an outcome measurement tool that auto scores?
- Upgrade your EMR to one that does more?
- Have a brief analysis call to share your pain then see the solution?

As a Medical Director, have you ever wished you could...

- Use one software system to document, manage medications and order labs?
- Check your state's PDMP within the patient record?
- Have a built in scheduler and appointments report?
- Have H&P, Evals, SOAP, Progress Notes, Discharge customized for you?
- Be alerted when Doctors Orders require signature?
- Communicate with staff and be HIPAA compliant?
- Stop using 3-5 softwares to get your daily work done?
- Have an analysis call and the EHR vendor actually listen to what you need?

As a Medical Biller for Addiction Treatment or Behavioral Health, have you ever wished you could...

- ✓ Bill a weeks worth of claims in 30 seconds?
- ✓ Bill professional claims in 20 seconds?
- ✓ Have all the documentation to present to a Payer at your fingertips?
- ✓ Be able to merge an Episode of Care into one document to electronically send?
- ✓ Track claims through to payer acceptance or denial?
- ✓ Be able to resolve in a click?
- ✓ Have authorizations and strong concurrent reviews to support your coding?

Addiction Treatment and Behavioral Healthcare specific EMRs can provide all of the above
