

# GLOBAL ARTIFICIAL INTELLIGENCE (AI) IN DRUG DISCOVERY MARKET

Information sourced from The Business Research Company  
thebusinessresearchcompany.com

The artificial intelligence (AI) in drug discovery market consists of sales of AI for drug discovery and related services. Artificial Intelligence (AI) for drug discovery is a technology that uses a simulation of human intelligence process by machines to tackle complex problems in the drug discovery process. It helps to find new molecules to identify drug targets and develop personalized medicines in the pharmaceutical industry.

**Reduction In The Overall Time Taken For The Drug Discovery Process** Is The Main Driver Of The Market

Major companies operating in the AI drug delivery market are adopting strategic collaborations to research and discover drugs using AI and are gaining significant popularity in the artificial intelligence in drug discovery market.

Expected  
**Growth Rate**  
Till 2023  
**42.9%**

Expected  
**Market Size** By  
2023  
**\$1.1 Billion**
