Topic	Class

Prior learning/place of lesson in scheme of work

It's a good idea to consider what students have already done that will help them in this lesson. Does this lesson tie in with any previous work? Is it part of a sequence of lessons? Even if this is the first lesson in a sequence, do you expect any prior knowledge, perhaps from previous years?

What the teacher needs to know

This is especially important if you are developing the lesson plan for your department. Teachers who are still relatively new to computing need to know the level of skills and understanding they have to have in order to teach the lesson effectively, and this information is not always clear when you look at the activities.

Resources

Objectives

If your lesson includes cross-curricular learning, reflect this in the objectives. Talk to your colleagues too, because other subjects can provide useful content and realistic problems for your computing students to solve.
