

When to Use	Entity
When you want to add a single space	<code>&amp;nbsp;</code>
When you want to add a paragraph break	<code>&lt;p&gt;&lt;/p&gt;</code>
When you want to add a line break	<code>&lt;br&gt;</code>
When you want to display text as-written	<code>&lt;pre&gt;&lt;/pre&gt;</code>
When you want to insert a tab (the hard way, as there's no easy way to do this in HTML)	<code>&lt;p style="text-indent: 5em;"&gt;&lt;/p&gt;</code>
