

# Chapter 1 - Computer Hardware

## Across

- 2.** A duplicate of a file, program, or disk placed on a separate storage medium that you can use in case the original is lost
- 5.** A portable computer designed to fit on your lap
- 7.** The main circuit board of the system unit
- 10.** Designed so the system unit fits entirely on or under a desk
- 11.** A collection of unprocessed items, which can include text, numbers, images, audio, & video

**12.** Computer hardware that records and/or retrieves items to and from storage media

**13.** A hardware component that enables a computer to send and receive data, instructions, & information to and from one or more computers

**14.** A case that contains electronic components of the computer used to process data

**15.** A device that connects to the system unit & is controlled by the processor in the computer

## Down

**1.** Hardware components that convey information to one or more people

**3.** Consists of electronic components that store instructions waiting to be executed & data needed by those instructions

**4.** A hardware component that allows you to enter data & instruction into the computer

**6.** An electronic device that can accept data, process the data, produce results, & store the results

**8.** Interprets & carries out the basic instructions that operate a computer

**9.** A communication device small enough to carry in a pocket
