

Stitch STARS

Take inspiration
from the leaders in
contemporary quilting

Whilst quilting is often looked upon as a traditional sewing technique, it's come a long way since the days of muted colours and raggedy seams. With almost infinite collections of colourful fabrics to choose from and a huge selection of machines and gadgets to help along the way, quilting is no longer stuck in the dark ages. Over the page we meet three modern stitchers who are paving the way and gather their expert advice and tips.

"If you're nervous, start small. You don't have to make a whole quilt straight away!"

Pat Bravo
