## Breast Self Examination

# You Should Examine Your Breasts Because:

breast lumps are not cancerous. Most women with breast cancer are cured if they are treated early. Most 95% of breast lumps treated by doctors are found by women themselves.

- What to Look for: nipples Changes in size or shape of your breasts or the position of your
- nipple). Sores or scaling on the nipple or areola (The darker skin around the Inward puckering of the skin or nipple
- Redness of skin
- Enlargement of skin pores

### How to Look for Changes:

squeeze the nipple of each breast and look for discharge waist and push firmly inward. Look once more for any changes. Gently straight over your head and repeat your inspection. Put your hands on your your lap and look for the changes described above. Next, hold you arms Begin the exam in front of a mirror with your arms relaxed at your side or on

#### What to Feel for:

- Any changes from previous exams
- Any lump or thickening.

#### How to Feel for Changes:

cover the entire breast. If any changes are noted, call the doctor. perhaps the size of a nickel or larger and the feel of your knuckle. Be sure to under nipple. Look for a lump or a knot that was not there before, quite hard, the nipple. "Walk" fingers thoroughly in concentric circles, then squeeze a face of a clock. Be sure to cover the entire breast from the outer edges to breast, then right hand on left breast. Move fingers around breast as if it were Lie down and with the flat of your fingers, feel for lumps, left hand on right

#### When to do the Exam:

Do the exam on the day your menstrual period ends

If you have reached menopause, examine your breasts on the same day each month, such as the first, fifteenth, or a day you'll remember.

no longer have monthly breast changes, examine your breasts on the same tenderness), examine your breasts on the day these changes disappear. If you If you have had a hysterectomy and have monthly breast changes (swelling or day of each month. If you are pregnant, examine your breasts on the same day each month.

Be sure to continue to have regular check-ups with your physician. health professional. Have your self-examination techniques checked by your doctor or other
