[illegible]

NOTES

Figure 1 consists of nine scatter plots arranged in a 3x3 grid. The rows represent three countries: USA, Canada, and UK. The columns represent three years: 1990, 2000, and 2010. Each plot shows the relationship between the number of children in the household (x-axis) and the number of children in the family (y-axis). The x-axis ranges from 0 to 10, and the y-axis ranges from 0 to 10. The plots show a positive correlation between the two variables. The USA shows the highest number of children in the household, followed by Canada, and then the UK. The UK shows the highest number of children in the family, followed by Canada, and then the USA. The correlation is generally stronger in the USA and Canada than in the UK.

Country	Year	Number of children in the household	Number of children in the family
USA	1990	0	0
		1	1
		2	2
USA	2000	0	0
		1	1
		2	2
USA	2010	0	0
		1	1
		2	2
Canada	1990	0	0
