

SQL Server 2017

Master Data Services Configuration Manager

The screenshot displays the 'Web Configuration' interface in the Master Data Services Configuration Manager. The left sidebar shows the 'Web Configuration' option selected. The main area is titled 'Web Configuration' and contains several sections:

- Configure the Web Application:** Includes a 'Website:' dropdown menu set to 'Default Web Site' and a 'Web application:' text box.
- Buttons:** 'Create...', 'Edit...', and 'Delete...' buttons are visible.
- Associate Application with Database:** Includes a 'Select...' button and fields for 'SQL Server instance:' and 'Database:'.
- Enable DQS Integration:** Includes a button to 'Enable integration with Data Quality Services'.

The 'Application Management' dialog box is open, titled 'Create Web Application'. It contains the following fields:

- Virtual path:** A dropdown menu showing '/(root application)'.
- Alias:** A text box containing 'MDS'.
- Application Pool:** A section with the following fields:
 - Name:** 'MDS Application Pool'
 - User name:** 'GAYATHRI-HP\Gayathri'
 - Password:** A masked text box with 8 dots.
 - Confirm Password:** A masked text box with 8 dots.

At the bottom of the dialog, there are 'OK' and 'Cancel' buttons.
