

js

```
// How to check if an object is empty
```

```
const obj = {};
```

```
if (  
  Object.keys(obj).length === 0 &&  
  obj.constructor === Object  
) {  
  // 🙌 Your object is empty  
}
```

```
// Fallback for older browsers
```

```
Object.prototype.toString.call(obj) === '[object Object]' &&  
JSON.stringify(obj) === '{}';
```
