

3 WAYS TO MERGE OBJECTS IN JAVASCRIPT

- THE CHEATSHEET -

A USE THE SPREAD OPERATOR

```
var combined = {...objA, ...objB};
```

B USE THE OBJECT ASSIGN FUNCTION

```
var combined = Object.assign(objA, objB);
```

C MANUAL FOR LOOP

```
var combined = {};  
for (var attr in objA) {  
    combined[attr] = objA[attr];  
}  
for (var attr in objB) {  
    combined[attr] = objB[attr];  
}
```
