

**Note:** You should be signed-in as an administrator in order to repair Inbox Corruption with the DISM tool.

Before we begin, you should know that the **DISM /Cleanup-Image** tool actually saves its log file to a couple of file locations mentioned below. In order to view these logs, you would be required to copy them from the locations below to your desktop, and then open them from your desktop.

C:\Windows\Logs\CBS\CBS.log
