

COLUMNS  are vertical containers that hold type or images. The width and number of columns on a page or screen can vary, depending on the content.

MODULES  are individual divisions separated by consistent space, providing a repeating, ordered grid. Combining modules can create columns and rows of varying sizes.

MARGINS  are buffer zones. They represent the amount of space between the trim size, including gutter, and the page content. Margins can also house secondary information, such as notes and captions.

SPATIAL ZONES  are groups of modules or columns that can form specific areas for type, ads, images, or other information.

FLOWLINES  are alignments that break space into horizontal bands. Not actual lines, flowlines are a method for using space and elements to guide a reader across a page.

MARKERS  help a reader navigate a document. Indicating placement for material that appears in the same location, markers include page numbers, running heads and feet (headers and footers), and icons.
