

Definitions

The Teams reports show data for active users and active channels. For example, if a user in your organization isn't active in Teams during the date range that you specified for a report, data for that user isn't included in that report.

Item	Definition
Active user	Measures the number of unique users who perform an action in Teams during the specified date range.
Active channel	Measures the number of channels of a team in which users perform an action during the specified date range.
