

2019 Astrological Calendar and Moon Planting Guide

PLANTING BY THE MOON is a simple method of organizing your activities in the garden. It is based on the phases of the moon and the signs of the zodiac. The moon's phases are: New Moon, First Quarter, Full Moon, and Last Quarter. The signs of the zodiac are: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius, and Pisces. The moon's phases and signs are arranged in a circular pattern around the calendar. The planting guide is a large, colorful wheel in the center, divided into sections for each month. It includes a list of plants to be planted in each month, along with a detailed explanation of the moon's phases and their effects on the garden.

THE MOON'S PHASES AND THEIR EFFECTS ON THE GARDEN:

- NEW MOON:** The best time to plant seeds. The moon is at its lowest point, and the earth is at its highest. This is the best time to plant seeds that will grow quickly and strongly.
- FIRST QUARTER:** The best time to plant seedlings. The moon is at its highest point, and the earth is at its lowest. This is the best time to plant seedlings that will grow quickly and strongly.
- FULL MOON:** The best time to plant root crops. The moon is at its highest point, and the earth is at its lowest. This is the best time to plant root crops that will grow quickly and strongly.
- LAST QUARTER:** The best time to plant leafy greens. The moon is at its lowest point, and the earth is at its highest. This is the best time to plant leafy greens that will grow quickly and strongly.

THE MOON'S PHASES AND THEIR EFFECTS ON THE GARDEN (continued):

- NEW MOON:** The best time to plant seeds. The moon is at its lowest point, and the earth is at its highest. This is the best time to plant seeds that will grow quickly and strongly.
- FIRST QUARTER:** The best time to plant seedlings. The moon is at its highest point, and the earth is at its lowest. This is the best time to plant seedlings that will grow quickly and strongly.
- FULL MOON:** The best time to plant root crops. The moon is at its highest point, and the earth is at its lowest. This is the best time to plant root crops that will grow quickly and strongly.
- LAST QUARTER:** The best time to plant leafy greens. The moon is at its lowest point, and the earth is at its highest. This is the best time to plant leafy greens that will grow quickly and strongly.
