CE-34878-0 is an error code on the PlayStation 4 that points towards some kind of problem that causes the game or application that is currently in use to crash. Seeing error code CE-34878-0 while playing a game or using an application on the PlayStation 4 is a rather common occurrence, albeit an extremely aggravating one. No sane person could be okay with the game they're playing or the application they're using simply crashing out of the blue and seeing an error message containing error code CE-34878-0 that basically states that an error has occurred with whatever game or application was previously running on the PS4.

An error has occurred in the following application.
(CE-34878-0)
Grand Theft Auto V
