

Tuesday 1st May 1/5/12

L.O. Division

24 divided by 4 = 6

$$\begin{array}{r} 6 \\ 4 \overline{) 24} \end{array}$$

The remainder 2  
goes here.

First, how many 4s  
go into 2? Zero,  
remainder 2  
Don't write 0 because  
we have not started yet.

Now we say how many 4s  
go into 24?  
We know that  $6 \times 4 = 24$   
so it is 6
