

Secret Codes

Numbers are a very important part of our world. We use numbers to tell the time, count objects, do mathematical operations, choose TV channels and even science. Let's use numbers to create a secret code by writing a corresponding number from 1-26 under each letter of the alphabet in the table below. For more fun, work on this part with a partner so you have someone to share your secret messages with.

a	b	c	d	e	f	g	h	i
j	k	l	m	n	o	p	q	r
s	t	u	v	w	x	y	z	

Write your secret message below on the top line.
Leave a blank space between your words. In the boxes
below each letter, write the number from above.

Now use a different piece of paper to write the message using only the numbers. You have officially created your own special secret code!

There is an example

1	b	e		d	e	g		a	f	e
12	3	8		19	22	9		29	32	8
