

Modern and Delightful Web Debugging Proxy

Native, High-performance, Distraction-free

The screenshot displays the Proxyman application interface. At the top, a status bar indicates 'Proxyman | Listening on port 9090'. Below this is a navigation bar with tabs for 'All', 'HTTP', 'HTTPS', 'WebSocket', 'JSON', 'Form', 'XML', 'JS', 'CSS', 'Document', 'Media', and 'Other'. The left sidebar contains a 'Favorites' section with 'Pin', 'Product Hunt', and 'Bear', and a 'Production APIs' section with 'httpbin.org'. Below these are 'All' and 'Apps 10' sections, listing various applications like Dropbox, Calendar, Proxyman, Google Chrome, Spark, Product Hunt, Bear, Insomnia, Slack Helper, and cloudd. The main area shows a list of intercepted requests. The selected request is a POST to 'http://httpbin.org/post' with a status of 'OK 200'. The bottom panel provides a detailed view of the request and response. The request headers include Host, Proxy-Connection, Cookie, Content-Type, Accept, User-Agent, and Accept-Language. The response is a JSON object containing 'args', 'data', 'files', 'form', and 'headers'.

ID	Date	URL	Client	Method	Status	Code	Duration
1	15:30:50	https://bolt.dropbox.com	Dropbox	CONNECT	Completed	200	-
