

Timestable Spinner Template

Instructions: *Print out the template on card.* Children then write an operation, for example, 3×6 in the inner section, and write the answer in the outer section. Complete each part of the pie with other operations. Cut out the sections of other top wheel except the dotted line which will be a fold for the door. Use a push pin to attach the wheels together so they will spin. Decorate the wheels and then cut out.

Usage: With the little flap door closed, spin or turn the top wheel to reveal an operation. Try and answer it before opening the flap to reveal the correct answer. |
