

$$24 \div 6 = ?$$

Total number of apples Division symbol Number of boxes Number of apples in each box

1. Draw a picture to understand the problem.

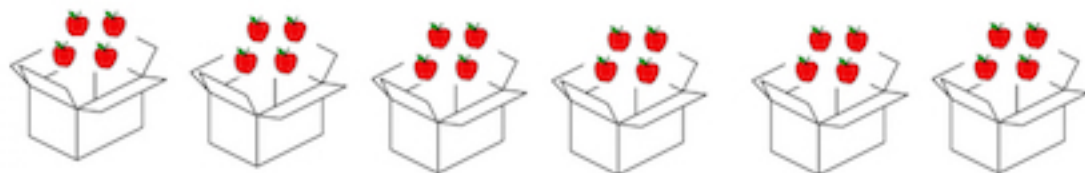

How many apples in each box?

2. Use table of 6 to find how many times 6 fits in 24.

$$6 \times 2 = 12 \quad 6 \times 3 = 18 \quad 6 \times 4 = 24 \quad 6 \times 5 = 30$$

3. Write the answer.

4 apples in each box
