

Main.java

```
1 import java.util.Arrays;
2
3 public class Main {
4     public static void main(String[] args) {
5         String givenString = "one,two,,three,,four,, ,,";
6
7         String[] resultArray = Arrays.stream(givenString.split(regex: ",",")).filter(e -> e.trim().length() > 0).toArray(String[]::new);
8
9         System.out.println(Arrays.toString(resultArray));
10    }
11 }
12
```

Run: Main
