

centering in CSS

center text with
text-align

```
h2 {  
  text-align: center;  
}
```

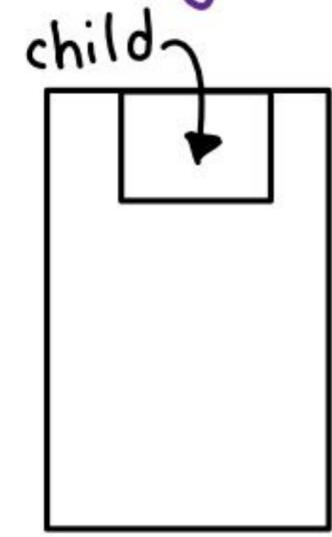

center block elements
with margin: auto

example HTML:

```
<div class="parent">  
  <div class="child">  
  </div>  
</div>
```

margin: auto
centers horizontally

```
.child {  
  width: 400px;  
  margin: auto;  
}
```

margin: auto
doesn't center vertically
by default

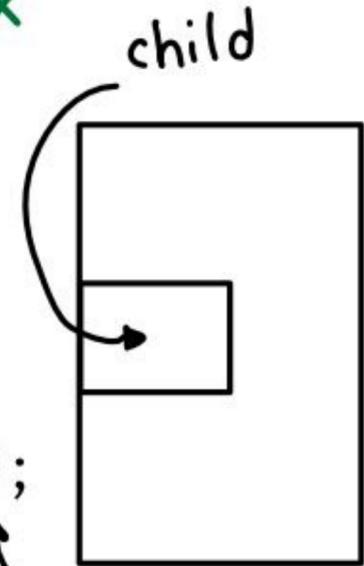

but! if the parent
is a flexbox then
margin: auto will
center vertically!

center vertically with
flexbox

```
.parent {  
  display: flex;  
}  
.child {  
  margin: auto 0;  
}
```

vertical horizontal

center both vertically
& horizontally

```
.parent {  
  display: flex;  
}  
.child {  
  margin: auto;  
}
```
