

**GOING  
PLACES**

**CHANGING  
THE WORLD.**

Rensselaer and the Albany International Airport (AIA) are partnering on a community-wide educational outreach Science, Technology, Engineering, Mathematics (STEM) program to be supported by Rensselaer student organizations and community partners.

We would appreciate your help to get the word out there!

**A regional STEM event for all community members, children and their families.**

**Date: Saturday, November 4, 2023**

**Time: 10 a.m. – 4 p.m.**

**Location: Million Air Hanger at Albany International Airport  
16 Jetway Dr., Albany NY 12211**

The engaging program is designed for students all ages, primary grades through middle school and high school with a multitude of STEM hands-on activities. The exhibits will include Rensselaer student organizations showing off their passion, i.e., RPI Engineering Ambassadors, Semiconductor Chip Champs, Drones Club, Materials Advantage, ChemE Car, Engineering a Sustainable World, Forge – a maker-space, Science Ambassadors, computer science projects, and more. There will also be a research showcase to introduce the community to the realm of groundbreaking science and engineering.

Regional educational partners such as Hudson Valley Community College Aeronautical Institute, miSci Museum, Empire State Aerosciences Museum, FIRST Robotics, etc. will also be there to showcase their STEM resources for the next generation of STEM enthusiasts.

So spread the news and come join us!
