

Egg Incubation Log

Set incubator temps to 99.5 degrees F, and always store and incubate eggs with pointy end down.

Start date		Candle - Day 7		# eggs incubating	
Humidity to 54%		Discard - Day 14		# eggs hatched	
Turn off rotator		Eggs pipping		Hatch Rate %	
Humidity to 70%		First hatch date		Candle on Day 23 to check for live eggs before discarding eggs	
Proposed hatch		Candle - Day 23			

Start date		Candle - Day 7		# eggs incubating	
Humidity to 54%		Discard - Day 14		# eggs hatched	
Turn off rotator		Eggs pipping		Hatch Rate %	
Humidity to 70%		First hatch date		Candle on Day 23 to check for live eggs before discarding eggs	
Proposed hatch		Candle - Day 23			

Start date		Candle - Day 7		# eggs incubating	
Humidity to 54%		Discard - Day 14		# eggs hatched	
Turn off rotator		Eggs pipping		Hatch Rate %	
Humidity to 70%		First hatch date		Candle on Day 23 to check for live eggs before discarding eggs	
Proposed hatch		Candle - Day 23			

Start date		Candle - Day 7		# eggs incubating	
Humidity to 54%		Discard - Day 14		# eggs hatched	
Turn off rotator		Eggs pipping		Hatch Rate %	
Humidity to 70%		First hatch date		Candle on Day 23 to check for live eggs before discarding eggs	
Proposed hatch		Candle - Day 23			

Start date		Candle - Day 7		# eggs incubating	
Humidity to 54%		Discard - Day 14		# eggs hatched	
Turn off rotator		Eggs pipping		Hatch Rate %	
Humidity to 70%		First hatch date		Candle on Day 23 to check for live eggs before discarding eggs	
Proposed hatch		Candle - Day 23			

Start date		Candle - Day 7		# eggs incubating	
Humidity to 54%		Discard - Day 14		# eggs hatched	
Turn off rotator		Eggs pipping		Hatch Rate %	
Humidity to 70%		First hatch date		Candle on Day 23 to check for live eggs before discarding eggs
