

Leprechauns

Leprechauns are small, magical beings that grant luck to the world. Leprechauns live in thier own realm, whích and can teleport through Rainbows. These Rainbows are in the sky all the time but can only be seen by humans when it rains. Leprechauns light them up with thier Shillelaghs.

Leprechauns exist for thousands of years, as old as the times of Ancient Greece. Leprechauns once roamed freely through the world along with the rest of the magical community until the mortal fear of magic.
