

A dramatic scene of a rocket launch. A rocket is seen ascending vertically, leaving a bright, intense trail of fire and smoke. The launch is taking place at night or dusk, as evidenced by the dark blue sky filled with stars. A large, bright sun or moon is positioned in the upper center of the frame, creating a strong lens flare and illuminating the scene. In the foreground, several tall, slender launch towers or service structures are visible, their silhouettes standing against the bright sky. A massive, billowing cloud of white and yellow smoke and vapor rises from the base of the launch, partially obscuring the lower part of the rocket and the towers. The overall atmosphere is one of power and awe.
