

About handycalendars.com

Welcome, I created handycalendars.com to provide people with great calendar templates that fit and print perfectly on a piece of standard-size printer paper (8.5 inches by 11 inches). I've personally created many different calendar template styles for people to either print or download as PDF files. Anyone is welcome to do either with any of the calendar templates provided on the website. I created every calendar on this website for handycalendars.com, so you will not find anything else exactly like them on the internet. To keep it clean and straightforward, I'm only displaying my 2022 and 2023 calendars currently on the main category pages ([basic calendars](#), [vertical calendars](#), [calendars with holidays](#)). If you need help with your printer settings to get the calendar to fit correctly on your paper, I have created a page to help you with that [here](#).
