Abstract

Class or Task Type	Wages paid	Days	Hours of Work
1. General			
2. Special			
3. Seasonal			
4. Night			
5. Holiday			
6. Sundry			
7. Total			

Prescriptions

1. The main end of our string is a 30-gauge wire (perhaps a D-cell battery).
2. Attach the string to the edge of your table. Use the lower end of the string to fix the dimensions; you can use a chalk line to secure the string to the edge of a table.
3. Adjust the string so that the mass almost touches the floor. Make a small pencil mark under the mass.
4. Let a block of wood on the track. Practice on lifting the mass so that it bounces 10 times.
5. While keeping the string tight, pull back the mass until it is exactly 10 cm above the floor.
6. Let the mass swing down and let the wood
