

A blank periodic table of elements template. The table is composed of colored boxes arranged in rows and columns, representing the periodic table's structure. The colors are used to distinguish different groups of elements: purple for the first two columns (s-block), yellow for the next two columns (d-block), green for the next six columns (p-block), blue for the next six columns (f-block), orange for the next six columns (g-block), red for the next six columns (h-block), and teal for the last six columns (i-block). The table is currently empty, with no element symbols or names present.
