"Wright Restoration immediately came out when contacted to help me and remediated was done in a timely manner. Once completed my upper respiratory issues resolved significantly and left me feeling much better."

-Melissa W.

Water Restoration Services

RELIABLE | HIGH QUALITY | HONESTY | TRUSTWORTHY

When a major water event happens in your home or business, we understand the disruption to everyday life that may occur. Fortunately, Wright Restoration Services has a team of water damage restoration experts standing by 24/7 to help resolve any problem you encounter.

Our Water Damage Restoration Process

- Provide a comprehensive assessment at the source where the water damage occurred and stop any additional damage to your property.
- Identify the type of water that caused damage and check for contaminants. This is critical so we can choose the correct extraction and cleaning methods.
- Determine the amount of water expelled and dampness levels by checking for water absorption on affected floors, carpets, walls, and porous surfaces like brick and concrete.
- Professional grade equipment is used during the extraction and is transferred to tanks stored on trucks for remote disposal. We double check for remaining areas of moisture and take action to prevent mold infestations.
- Carefully inspect all contents in the affected area for water damage on the property. We rescue what can be saved and dispose what can't be salvaged.
- Dehumidifiers and dryers are used to treat the structural materials like walls, insulation, and flooring to ensure the property is dry.
- Environmentally safe products and practices are used as we thoroughly clean, disinfect and deodorize the area.

Wright Restoration Services is licensed, bonded, and insured. We are IICRC Certified (Institute of Inspection, Cleaning and Restoration Certification) company along with all of our technicians. If you are looking for a highly rated water restoration experts, please call us now at 610-HELP-NOW and one of our team members will assist you further.
