NOTES

Figure 1 is a 3D bar chart illustrating the percentage of respondents by age group and gender who use the Internet. The Y-axis represents the percentage (0-100%). The X-axis represents age groups (18-24, 25-34, 35-44, 45-54, 55-64, 65+). The Z-axis represents gender (Male, Female). The chart shows that Internet usage is highest among the 18-24 age group and lowest among the 65+ age group. Usage is generally higher for males than for females across all age groups.

Age Group	Male (%)	Female (%)
18-24	95	90
25-34	85	80
35-44	75	70
45-54	65	60
55-64	55	50
65+	45	40
