

# Remove a character from a string at a specified position

## C Programming Example

```
wDemo > NewDemo > C main() main()
char s[] = "12345-1234"

return 0;
}

bool remove_char(char *s)
{
    int length = strlen(s)

    if (pos >= length) ret

    for (int i = pos; i <
        s[i] = s[i + 1];

}
```
