

```
1 package com.journaldev.string;
2
3 public class StringToCharJava {
4
5     public static void main(String[] args) {
6         String str = "journaldev";
7
8         //string to char array
9         char[] chars = str.toCharArray();
10        System.out.println(chars.length);
11
12        //char at specific index
13        char c = str.charAt(2);
14        System.out.println(c);
15
16        char[] chars1 = new char[7];
17        str.getChars(0, 7, chars1, 0);
18        System.out.println(chars1);
19
20    }
21
22 }
23
```
