

1.  What is energy?

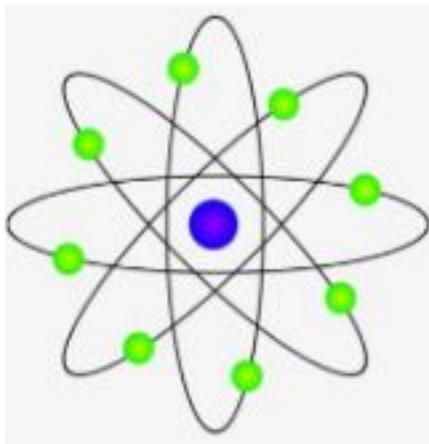

- | | |
|--|--|
| <input type="checkbox"/> A moving energy | <input type="checkbox"/> B renewable energy |
| <input type="checkbox"/> C stored energy | <input type="checkbox"/> D The ability to do work. |

2. What is kinetic energy?

- | | |
|--|---|
| <input type="checkbox"/> A stored energy | <input type="checkbox"/> B potential energy |
| <input type="checkbox"/> C moving energy | <input type="checkbox"/> D renewable energy |

3. What is potential energy?

- | | |
|---|---|
| <input type="checkbox"/> A renewable energy | <input type="checkbox"/> B non renewable energy |
| <input type="checkbox"/> C moving energy | <input type="checkbox"/> D stored energy |

4.  _____ energy is stored in the atomic structures.

5. What is NOT a renewable energy source?

- | | |
|----------------------------------|---------------------------------|
| <input type="checkbox"/> A solar | <input type="checkbox"/> B wind |
| <input type="checkbox"/> C water | <input type="checkbox"/> D coal |

6. Which of these things are NOT examples of renewable energy sources?

- | | |
|----------------------------------|--------------------------------|
| <input type="checkbox"/> A water | <input type="checkbox"/> B oil |
|----------------------------------|--------------------------------|
