

Shift Pattern Table Information

Use the shift pattern table to define a set of shift patterns to be used in automatic schedule generation. Drag and drop a shift to the appropriate cell on the table to assign it to a pattern. You can assign multiple shifts to each cell. To delete an assignment, click on the cell to select then press the Del key. Adjusting the number of patterns will change the number of rows in the table. Likewise, adjusting the number of days will change the number of columns.
