

## New Email Template1

File Edit View Insert Format Tools Add-ons Help Last edit was seconds ago

Hi #Name#,

This is just some dummy text for this default email template. The idea is to show you how the emailing is going to work.

When you select this document as the email template for your campaign, this text will be ***converted to a nice looking HTML email***. Thanks to [FUZEN](#) for gluing together all your favorite apps to make this automation possible.
