i'm worried about your account right now bro. Because if this report cant get removed on your profile and get processed, they will now ban you, because support team thinking that the scammer account is yours

Don't think they will just ban an Account if there's no Evidence or Proof that the account you said received \$200 from a Steam Wallet

bro if this report get process now you will get permanent banned on steam and i am very sorry about what happened but bro the main reason why i am here is that the support team wants you to confirm to him that you are not involve my mistake report so that they will cancel my report and remove your account from ban okay?
