

Reading a Ruler

Wednesday, May 08, 2013
2:25 PM

Learning Target: We are reviewing how to read a measurement with a ruler.

$\frac{1}{8}$ inch
 $\frac{2}{8} = \frac{1}{4}$
 $\frac{4}{8} = \frac{1}{2}$
 $\frac{6}{8} = \frac{3}{4}$
 $\frac{8}{8} = 1$ inch

$$4\frac{5}{8} = \frac{37}{8}$$

$$7\frac{2}{8} = 7\frac{1}{4} \text{ inches}$$

$$7\frac{1}{4}$$
